

Delock Fiber optic cleaning pen for connectors with 1.25 mm ferrule

Description

This cleaning pen by Delock is suitable for quick and thorough cleaning of fiber optic connectors (LC and MU) to remove dirt particles e.g. dust in the connector ferrules.

Simple application

The fiber optic connector can be simply placed on the cleaning handle and pressed down. A cleaning tape cleans the fibre end surfaces with one turn. When snapping into place an audible click confirms the end of the cleaning process. The existing tape status can be followed through a viewing window in the cleaner. Up to 800 cleanings are possible.

Specification

- For connectors: LC and MU
- For up to 800 cleanings
- Material: plastic
- Colour: blue
- Dimensions (LxWxH): ca. 185 x 17 x 17 mm
