| <b>Model NO.</b>                    | <b>PhoneSoap 3.0</b>                                                                                                                                                                                                                                                                                       |
| Sanitizing                          | Designed to fit even the largest phones. Although PhoneSoap 3.0 was designed with cell phones in mind, other items can also be safely sanitized. If it fits, it can be sanitized!                                                                                                                          |
| Method                              | Put in your device and close the lid, the blue logo indicator turns on while cleaning and shuts off when it is done.                                                                                                                                                                                       |
| Sanitizing time                     | 10 minutes                                                                                                                                                                                                                                                                                                 |
| Universal charger                   | PhoneSoap 3.0 has a standard 5V USB port in the back next to the unit's power port. Plug your own charge cable into the back of the PhoneSoap and into your phone to charge.<br>The PhoneSoap 3.0 unit is powered via a Wall outlet.<br>Any USB charged device can be safely charged and sanitized inside. |
